

The following Class Rule Interpretation for the International Formula 18 Catamaran has been approved to be effective at 10/10/2018 in accordance with World Sailing Regulation 10.12.

Relevant Class Rule:

D.5 TRAMPOLINE

D.5.2 CONSTRUCTION

- (a) A single trampoline, which may be in separate sections, shall cover the area between the front beam, the rear beam and the hulls.
- (b) Fittings for the attachment of the trampoline are optional.
- (c) A spinnaker bag is permitted.
- (d) Storage bags and pouches are permitted.

Interpretation:

D.5.2. (a) states single trampoline. This means single-ply trampoline, except at edges, spinnaker bag, storage bags and pouches. The separation in sections concerns the separation of the plane between the front beam, rear beam and the hulls, and not a separation in vertical independent planes. Consequently, additional trampoline surfaces are not permitted.
